ABOULKHER GROUP®
TACTICAL GEAR

MISSION

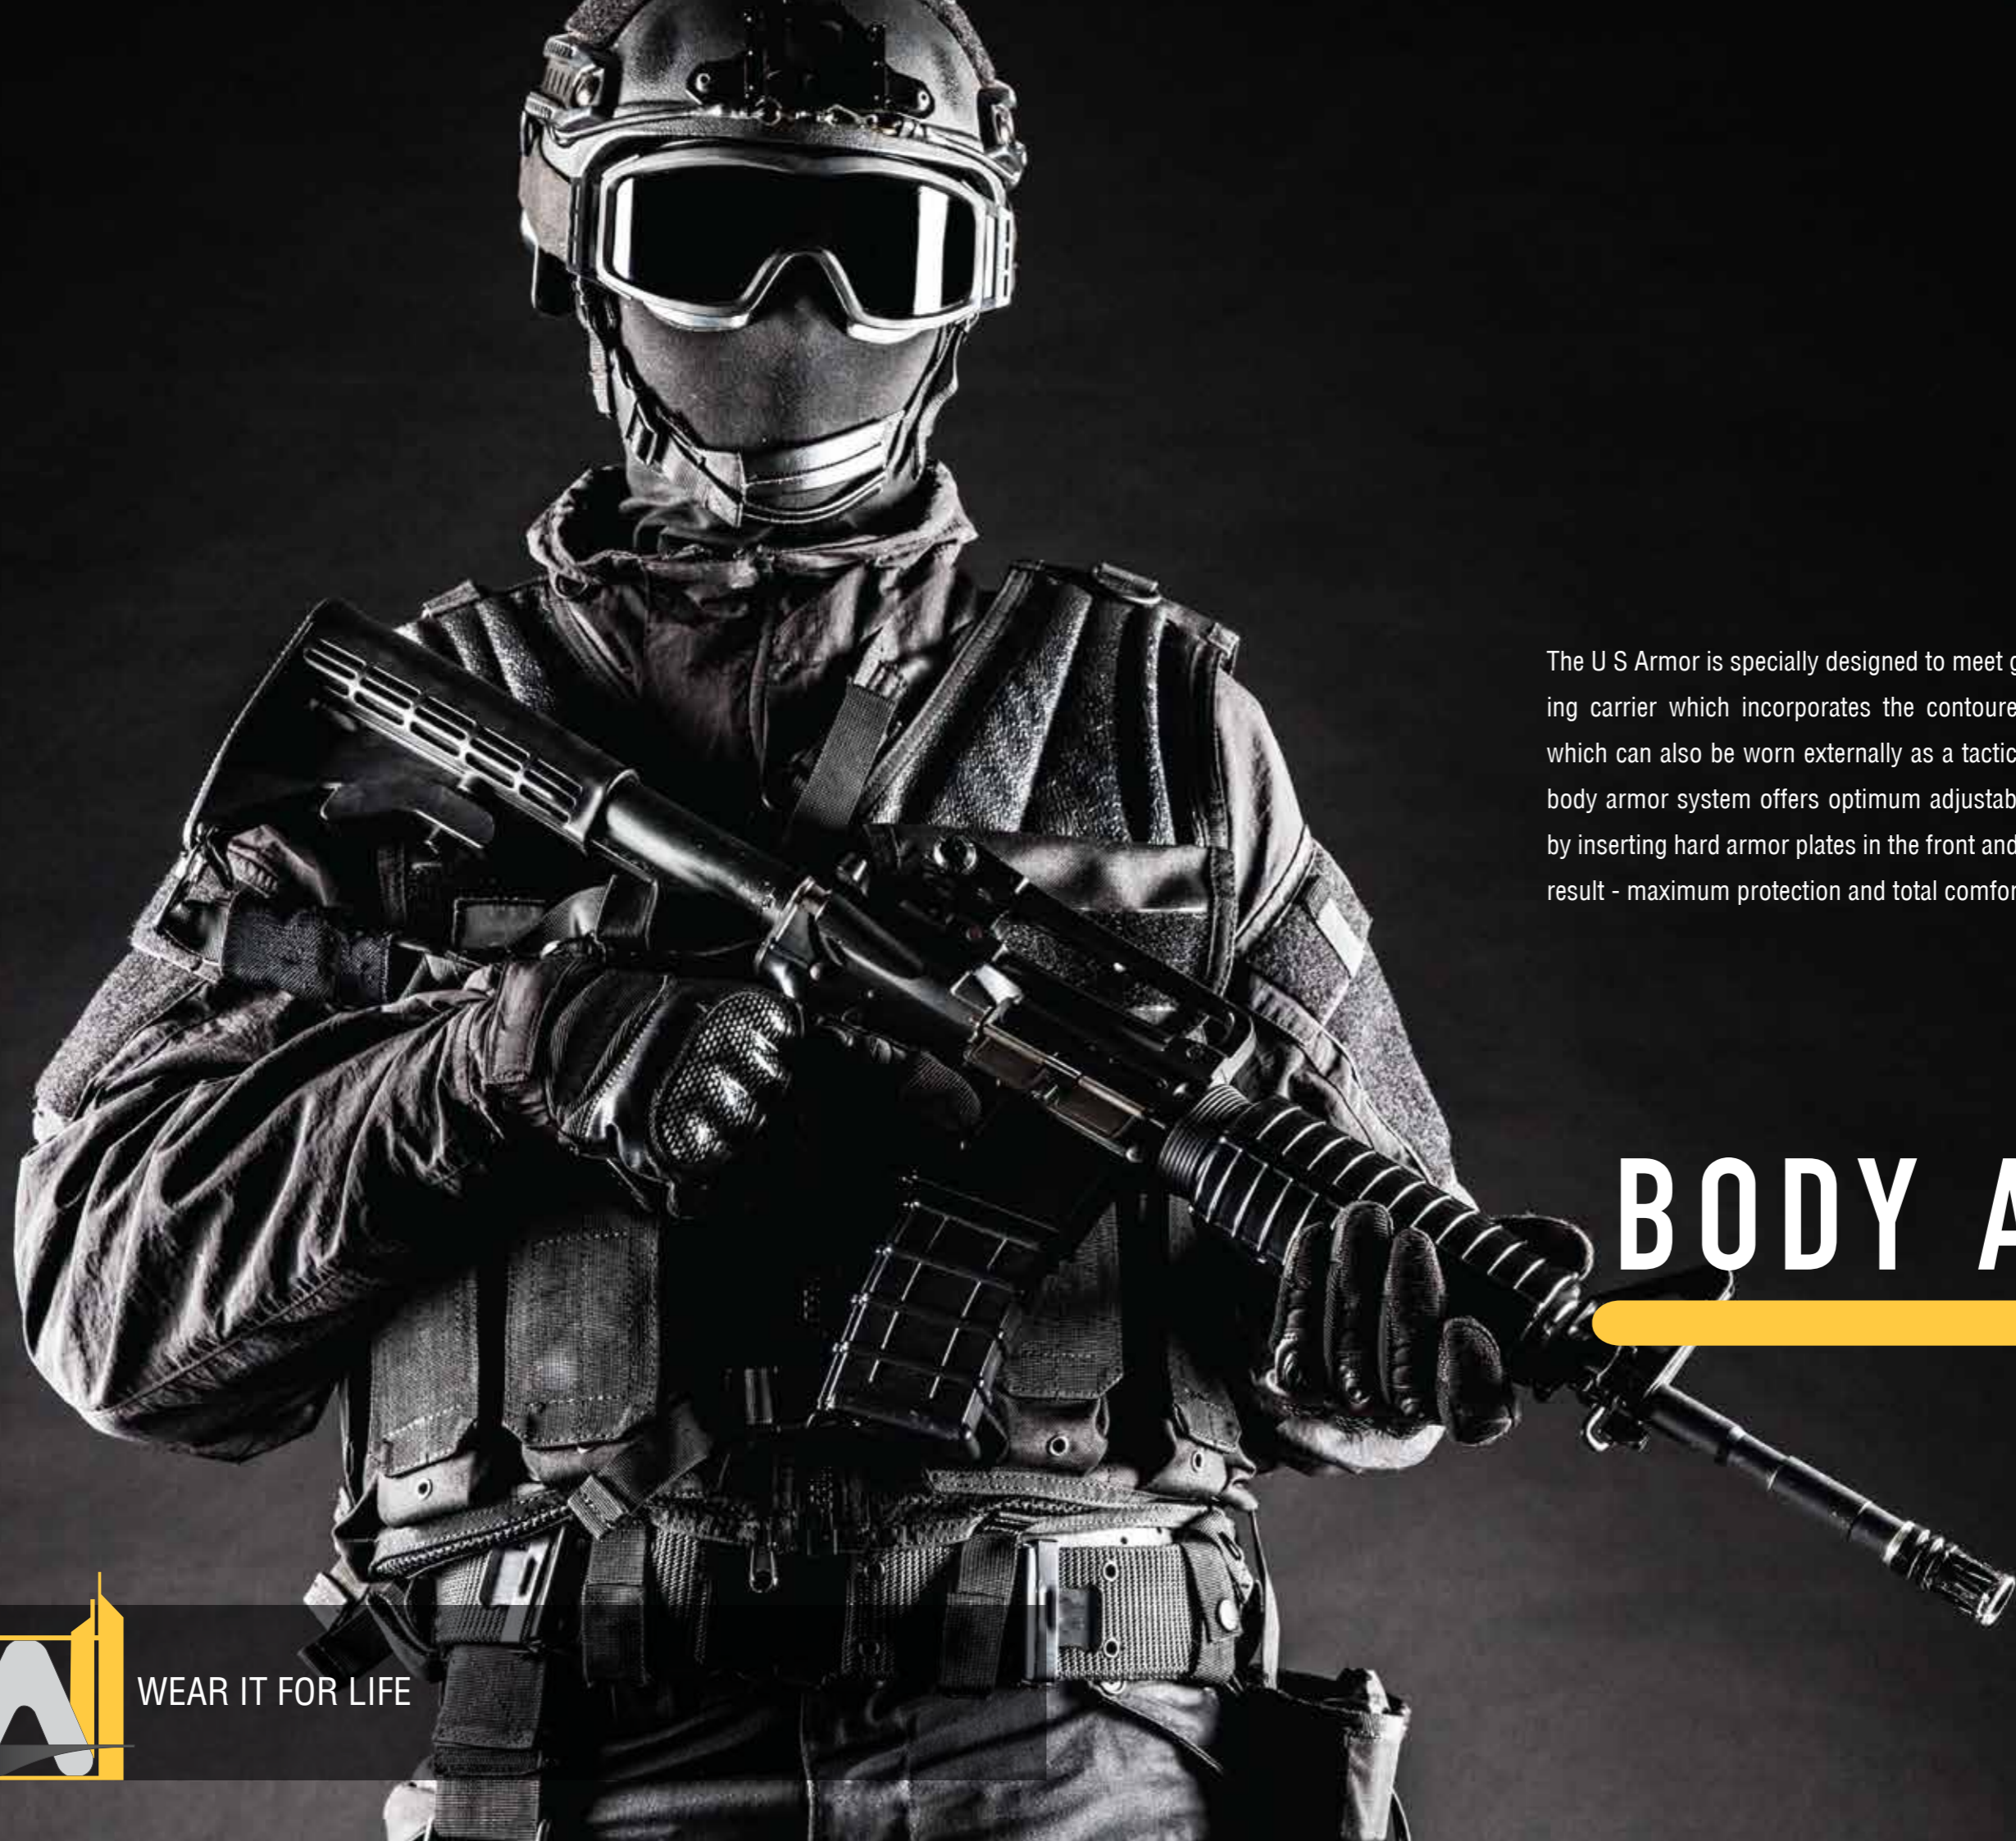

ABOULKHER GROUP is the leader in export & transport management and distribution in the international public safety, military and outdoor sports industries.

ABOULKHER GROUP has created a group of companies that are designed to service all aspects in the GCC and local markets.
Specializing in Emergency Services, Military and Outdoor Product Distribution
International Product Distribution Network
Manufacturer Representation
Establishment and Management of International Export Sales and Marketing

VISION

We push to be first, but must also be the best.
We get excited about winning and taking on seemingly impossible challenges.
We prefer not to coast, draft, take the easy route or sit still.
We are inspired by the missions of our customers.

ABOULKHER GROUP®
TACTICAL GEAR

The U S Armor is specially designed to meet global needs for a dual-functioning carrier which incorporates the contoured shape of a concealable vest which can also be worn externally as a tactical vest. This extremely versatile body armor system offers optimum adjustability with instant rifle protection by inserting hard armor plates in the front and back, easy access pockets. The result - maximum protection and total comfort at an exceptional value.

BODY ARMOR

WEAR IT FOR LIFE

TACTICAL VESTS

OPERATOR

The Extended Rifle Plate Carrier (Operator) is designed to be worn alone or over-the-top of concealable body armor in a first responder situation.

The Operator has both front and back rifle plate pockets, 2 rifle magazine slots on the front cummerbund, and wrap-around MOLLE surface area for attaching additional pouches, holsters and other mission items.

THREAT LEVELS

IIIA (Level III or IV w/ optional rifle plates)

Available Armor Packages:

- (NIJ .06) Enforcer 5000
- (NIJ .06) Enforcer XP
- (NIJ .06) Enforcer 2000
- (NIJ .04/.05) Enforcer XLT
- (NIJ .04/.05) Enforcer TV
- (NIJ .04/.05) Enforcer Classic

KEY FEATURES

- Provides flexibility to move between LOW to HIGH threat environments
- Can be worn under or over the uniform shirt based on situation/preference
- 10" x 12" rifle plate pockets (front/back)

ENFORCER 600

The thinnest, lightest and most flexible NIJ .06 Certified ballistic vest on the market!

The Enforcer 6000 is 100% MADE IN USA, using Core Matrix® technology with ultra-high molecular weight polyethylene fibers from Honeywell® and DuPont™.

We combine these in a thin, lightweight, low-stitch ballistic package for the highest performing, NIJ .06 Certified ballistic vest available today (male < 1 lbs. per square foot).

THREAT LEVELS

IIIA 6316M (male) / 6326F (female)

Armor Package:

- DuPont™ Kevlar®
- Honeywell Gold Shield®
- Spectra Shield®

KEY FEATURES

- NIJ 0101.06 Certified (male & female)
- Less than 1 lb. per square foot
- Outlast™ Heat Management Carrier option
- CuTEC Copper Thread Carrier option

MSTV

The Mission Specific Tactical Vest (MSTV) has both the ability to receive soft body armor ballistic panels as well as front/back/side hard armor plates for rifle threat protection. The MSTV is designed specifically for the first responder to include Threat Level IIIA ballistic protection at the shoulders and at the officer's sides. This vest is to be worn over the officer's uniform shirt as a stand alone vest or as an up-armor plate carrier when placed over an officer's existing soft body armor vest.

THREAT LEVELS

IIIA

KEY FEATURES

- Front/back 10" x 12" rifle plate pockets
- Left/right 6" x 6" side plate pockets
- Threat Level IIIA ballistic protection at shoulders and sides
- Dual M4/AR15 magazine pouches located in front panel cummerbund

FEMALE BODY ARMOR

U.S. Armor forms actual bust cups into the ballistic armor through our unique darting procedure, which produces an unparalleled level of comfort for the female officer. This approach to female body armor properly accommodates the varied lines and unique demands of the female form in the line of duty.

With our proprietary 13-point measurement procedure, our vests fit your body to its exact size, shape and curves. Comfort you will enjoy, every day!

THREAT LEVELS

II, IIIA

ARMOR PACKAGE

NIJ 0101.06

- Enforcer 6000 (6326F)
- Enforcer 5000 (5226)

NIJ 0101.04/.05

- Enforcer XLT (XLT2AF, XLT2F, XLT3AF)
- Enforcer TV (TV2AF, TV2F, TV3AF)
- Enforcer USA (USA2AF, USA2F, USA3AF)

KEY FEATURES:

- Increased comfort
- Decreased fatigue
- Formed Bust Cups in the ballistic material

MSTS

Ground Breaking in design and ideally suited for response teams who require convenient load bearing capabilities combined with the flexibility to adapt to any rapid assault mission, the MSTS offers unsurpassed performance. With its ultra-durable construction and extreme versatility in fit, the MSTS offers brute force protection and more custom features than any other tactical vest on the market.

KEY FEATURES

- 500 Denier nylon Cordura® DWR carrier construction with Spacer Mesh interior
- Dual size combo plate pockets in the front and rear for 8"x10" or 10"x12" plates
- Internal Plate Retention System with plate centering straps
- Removable 4" internal cummerbund provides load-bearing stabilization
- Adjustable, external cummerbund with removable stiffeners accommodate 5"x8" trauma inserts
- Shock absorbing, 3" interior elastic shoulder straps for improved weight distribution and load bearing support
- Shoulder strapping system offers up to 3" of adjustability with two D-rings for quick release
- Ambidextrous shoulder webbing to hold radio microphone
- Removable collar design offers improved helmet interface (optional)
- Removable and adjustable throat protector (optional)
- Removable bicep protector with plate pockets for optional 5"x8" ballistic plates (optional)
- Two integrated "kangaroo" pockets capable of securing AR-15, M16 or similar magazines and bungee cord long arm to secure magazines
- Durable butt retention surface for both left and right hand weapon mounting
- Dual holster ambidextrous attachment system
- Retractable, pull down groin protector (optional)
- 360° MOLLE Compatible Webbing Attachment System allows configuration of multiple pouches
- High visibility, removable identification in the front, back and biceps
- Multiple "web-clips" allow attachment of additional equipment
- Complete tactical armor system includes 5 equipment pouches

FIREARMS INSTRUCTION VEST

This vest easily converts your concealable body armor into a high visibility, external ballistic armor carrier, which is ideal for Range Masters and Firearms Instructors.

The Firearms Instructor Vest is a highly functional and highly visible tool for any Range Safety Team!

AVAILABLE ARMOR PACKAGES

- Accepts all U.S. Armor NIJ .06 & NIJ .04/.05 ballistic panels

KEY FEATURES

- High performance outer carrier option for your concealable ballistic armor
- Offers back relief during long evolutions by removing the weight from the gun belt and transferring it up onto the vest using convenient gear pouches/holsters
- Built in "Safety Red" for high visibility on the range
- High visibility name tapes and badge holder

CONCEALABLE CORRECTIONAL

Spike protection for improvised spike/slash weapons found in jails, prisons or other custodial environments. U.S. Armor's Concealable Correctional series offers protection from NIJ 0115.00 Spike Level 1, 2 and 3 threats.

Each threat level has been optimized for maximum performance, while still maintaining a light, thin and flexible armor package with the officer's comfort in mind.

THREAT LEVELS

IIIA

KEY FEATURES:

- Front/back 10" x 12" rifle plate pockets
- Left/right 6" x 6" side plate pockets
- Threat Level IIIA ballistic protection at shoulders and sides
- Dual M4/AR15 magazine pouches located in front panel cummerbund

RIFLE PLATES

LEVEL III

LEVEL IV

LEVEL IIIA

POLY NIJ .05/04 Plate Level III

The Poly Plate is half the weight of its comparable Level III Ceramic rifle plate, which reduces officer fatigue and the overall weight of your tactical load out. The Poly Plate also offers a multi-hit feature that Ceramic plates do not offer and floats in water.

When a Rifle Threat is present and soft ballistic armor is not enough, U.S. Armor offers a wide variety of hard ballistic armor (Ceramic, Steel, and new lightweight Polyethylene) to protect you against either Level III or Level IV rifle rounds.

THREAT LEVEL

III (Stand Alone)

NIJ 0101.04/.05 Certified

Shooter's Cut

- Thickness: 0.89 in (2.26 cm)

- Size: 8" x 10" | Weight: 2.0 lbs (0.91 kg)

- Size: 10" x 12" | Weight: 3.1 lbs (1.41 kg)

Side Plate

- Thickness: 1.00 in (0.45 cm)

- Size: 6" x 6" | Weight: 1.0 lbs (0.45 kg)

Ballistic Capabilities

NIJ 05.0101.04, Level III rounds

- 7.62 x 51 mm (147 gr NATO FMJ) – 2780 fps/847.34 mps

* V50 Data and special testing available

Warranty

- Ballistic Plate—60 months

RMA's Special Rifle Threat (SRT, model #1003) plate is designed to defeat the most common rifle threats in the world today, while being extremely tough and lightweight. At just 2.4 pounds, the SRT plate allows the user to be quick and agile on his feet yet still boast the stopping power to defeat multiple hits from a 7.62x39 (AK 47) and a 5.56x45 ball round.

DETAILS

- Special threat multi-hit tested by an NIJ Certified Laboratory
- Special Rifle Threat Stand Alone
- Ultra High Molecular Weight Polyethylene
- Shape & Cut: single-curve, shooter's cut
- Positive buoyant
- Waterproof
- Made in the USA
- Thickness: 0.56"
- 10.00" x 12.00", 2.4 lbs. (.93kg), single-curve

RMA's Level III (model #1088) plate was specifically designed with the US Navy and Marine Corps in mind and is manufactured as single and multi-curve plates. Special operations engineered to be positive buoyant, in addition to weighing just 3 pounds in the single curve model. The Level III will defeat multiple 7.62x51 FMJ and all small arms munitions.

RMA's Ultra High Weight Molecular Polyethylene are designed and manufactured in the USA and are built to exceed the standards set forth by the National Institute of Justice's standards for an NIJ 0101.06 Certifications for a stand alone plate. Anyone who depends on superior protection in the most dangerous situations can depend on the strength and quality of this Level III stand-alone rifle plate.

DETAILS

- NIJ Certified 0101.06
- Level III Stand Alone
- Shape & Cut: single-curve, multi-curve, shooter's cut
- Waterproof
- Positive Buoyancy
- Thickness: 1"
- 10.00" x 12.00", 3.0 lbs. (1.36kg), single-curve

ELITE BOMB SUIT

THE 'NEXT GENERATION' BOMB SUIT

ELITE BOMB SUIT

THE 'NEXT GENERATION' BOMB SUIT

1. Lumbar protection includes an easy to use and effective evaporative cooling system
2. Increased visibility contributing to better situational awareness
3. Lighter weight helmet reduces operator fatigue
4. No cables or wires to attach or remove
5. Easy to use four point retention for a secure fit
6. Easy to use rapid doff system removes jacket in seconds
7. Easy to use rapid doff system removes pants in seconds
8. Improved ballistic performance
9. Improved buckle and hasp retention system – no hook and loop retention
10. Chest plate easily removed by operator when desired
11. Increased mobility and reduced felt operator fatigue
12. Improved fan assembly increases air circulation in the helmet to reduce CO2 buildup and clear visor
13. Defroster in visor ensures optimum clear visibility
14. Leg 100% encapsulated for increased leg protection
15. Easy to donn and doff (Does not require an assistant to donn)

DESCRIPTION

Point Blank Enterprises and Morgan Advanced Materials have partnered to present the 4025 Elite Bomb Suit ensemble developed from 10 years of operational deployments throughout the United Kingdom. The 4025 Elite Bomb Suit was developed with input from Defence Explosive Munitions and Search (DEMS) – Felix Center. Here are some of its features:

- Increased mobility
- Reduced fatigue
- Improved protection
- Increased visibility and situational awareness

RIOT PROTECTIVE

WHEN THE SITUATION REQUIRES FOR MORE THAN USUAL PROTECTION, WE OFFERS A FULL LINE OF EXTENDED COVERAGE.

RIOT PROTECTIVE SUITS

The Imperial™ Riot Control Kit features lightweight EVA foam padding for maximum movement and protection. The upper body protector is available in sizes MD-XXXLG to provide the perfect fit. The knee/shin guards feature Trion-X™ non-slip reinforced grip technology for maximum durability. The TG40 thigh/groin protector features a Molle System on both thighs allowing the user to attach a holster, mag pouches, or molle pockets of any kind. This full body protective suit is easy to assemble, and offers a lightweight alternative to heavier hard-shell riot suits.

Includes:

- DCP-2000: Imperial™ Upper Body and Shoulder Protector
- FP10: Forearm Protectors
- TG40: Thigh/Groin Protector with Molle System
- DNSG-B: Neoprene Knee/Shin Guards w/ Non-slip knee caps

GROIN PROTECTOR WITH MOLLE SYSTEM

This Damascus® Imperial™ TG40 Thigh/Groin Protector with Molle System is designed to compliment the DCP-2000 and DFX2 Upper Body, Chest and Shoulder Protection Systems also from Damascus®. It was specifically designed for blunt trauma protection during riot control situations and protects the thigh and hip areas. The addition of the Molle System on both thighs allows the user to attach a holster, mag pouches, or molle pockets of any kind. The TG40 also features an adjustable and removable groin protector. Adjustable fit allows for one size to fit all.

- Designed to compliment the #DCP2000 and DFX2 Imperial Upper Body, Chest and Shoulder Protection Systems.
- Molle System on the thighs allow users to attach molle holsters or pouches
- Lightweight cellular EVA foam padding offers excellent protection from blunt force trauma
- Polyester mesh lines the inside which offers comfort and breath-ability
- Four inch elastic straps with Velcro® wrap around the thigh for a secure and snug fit
- Adjustable and removable padded groin protector
- Non-ballistic
- One size fits all

UPPER BODY PROTECTION SYSTEM

Created by Damascus Gear™, the DFX2 was designed to provide substantial protection from blunt force trauma without sacrificing the fit or comfort. The chest, shoulders, and back hard shell panels have a modular flex design allowing for all shapes and sizes to fit comfortably without sacrificing much needed mobility. The chest portion of the suit features an aluminum stab plate insert for additional protection. The back plate offers a raised portion in the center that protects the spine from blunt force injury.

- Lightweight cellular Protium™ foam pad design for maximum movement and protection
- 3mm Electrum XK8™ hard shell front and back panels feature a unique Damascus® 3-panel flex design for optimum movement, fit and comfort
- Aluminum Plate insert for the chest portion offers ultimate protection from stab and projectiles (non-ballistic)
- Hard shell back plate offers a raised center for optimal spinal cord protection
- Electrum XK8™ plate with shock absorbing Protium™ foam covers both top of shoulder and upper arm
- Shoulder and side adjustable for increased flexibility and range of movement
- Protected with a durable tight-weave polyester mesh on the outside
- Pocket on interior back side to hold a hydration system (sold separately)
- Adjustable and removable groin protector
- Adjustable reinforced straps with Velcro®
- Velcro® areas to secure ID name plates (sold separately)
- Non-ballistic

RIOT PROTECTIVE SUITS

POLICE

BALLISTIC BLANKET

PROTECT YOUR SITE

SOFT ARMOR BALLISTIC BLANKET

manufactured from high-strength, lightweight ballistic fabrics which are designed to highly provide a protective barrier against (Level IIIA) ammunition. These highly portable blankets are specifically designed to be quickly and easily thrown over windows, doors and walls, and can be quickly deployed for various high risk situations including executive security, perimeter defense, mine clearance usage and other personal shield and vehicle transport applications. Breaching Blanket also available.

BREACHING AND RESCUE BLANKET

FEATURES

- Six specially designed carry handles so the Breaching Blanket can be used as an improvised litter to transport injured persons if needed.
- Specially designed Litter Straps are secured out of the way until deployed to help retain patient on The Point Blank Enterprises Breaching and Rescue Blanket when used as a litter.
- A sturdy Camera Pouch mounted on the upper-face of the Breaching Blanket to facilitate the Point Blank Iris-Cam or other cameras of your choice. (Camera not included)
- Secure Fire Extinguisher Retention ensures that a small fire extinguisher is always on hand during breaching operations.
- Non-Skid Foot Pad Support constructed from Diamond Skid® provides platform to stand on while the blanket is deployed. While standing on the foot pad, the user will have optimized traction as well as coverage of lower extremities.
- Constructed with rugged 1000 Denier outer cover.
- Convenient Shoulder Strap to carry Breaching Blanket.
- Weight of blanket with ballistic: 22.5 lbs .
- One 3" x 12" hook/loop ID Panel.
- Size: 32" x 72"
- Color Available: Black, Ranger Green, Olive Green
- The breaching and rescue blanket has been tested against 17 gr FSP with average V50 per MIL-STD-662F of over 1788 f/s.
- The BARB ballistic system is protected from exposure to environmental elements. The ballistic cover material exhibits a high degree of water repellency and resistance to MVT (moisture vapor transfer). The panel cover is treated to resist moisture and staining. In addition, the panel cover incorporates Nano-Technology, Anti-Microbial/Anti-Fungal treatment that inhibits the growth of mold and bacteria. The panel cover also incorporates an all-weather film laminate technology to further enhance resistance to moisture migration and MVT.

HELMETS

WHEN YOU CONTINUE TO USE ANY EQUIPMENT IN YOUR PERSONAL TIME AFTER RETIRING FROM ACTIVE DUTY, JUST BE SURE THAT THIS EQUIPMENT IS "UNUSUAL"

RAPID ATTACK HELMET

The Rapid Attack Helmet offers ballistic protection in a high cut design to provide minimal weight and maximum visibility. All U.S. Armor helmets offer a superior level of ballistic protection with reduced weight and added comfort for the officer. Our unique support structure and lamination process ensures that U.S. Armor helmets have a minimal back face deformation from all Level IIIA rounds including .357 SIG and .44 Magnum

Threat Levels

IIIA

Key Features:

- High cut helmet for minimal weight and maximum visibility.
- Innovative suspension and adjustment system.
- Built-in Picatinny rails system and NVG front mount for additional optics and illumination equipment.

NIJ 0108.01 Certified

BREACHING AND RESCUE BLANKET

OUTER SHELL: The outer shell is made of lightweight fiberglass. The shell is offered in all sizes . There is an integral or a snap on visor that comes with the helmet. The edge of the shell is finished with a tough molded metal core scuff-proof edging. The shell finish is made of a Polane and Urethane that helps prevent chips in the paint. The shell is available in a wide array of standard as well as custom colors. The paint is protected by a clear hard coat, scratch-resistant coating.

SUPERIOR VENTING: Accomplished by several different options. All Vented helmets have an Air Channeled Interior that permits cool air circulation across the entire head. Whether front vents, rear exhaust vents, or 4 top vents, the helmet provides effective cooling for all riding conditions

RETENTION: Sewn naugahyde shaped as a letter "Y" to allow hearing, and is riveted to the outer shell. The throat strap is made of nylon tubular webbing that utilizes a Comfort Throat Sleeve, adjustable fastener and quick release snap fastener. Quick release buckles are also available and provide instant release. A nape strap on the back of the harness is also included on the helmet. This strap eliminates the rolling of the helmet forward or backward keeping the helmet completely secure on the head while performing duties. The harness has provisions for Velcro attachment of accessories such as ear muffs, and foul weather adapters.

BREACHING AND RESCUE BLANKET

SHELL: FIBERGLASS full coverage shell with multiple layer impact absorbing materials. Shell incorporates an integral molded visor and side attachment and thumb screws for attaching Riot Control Faceshield. Three shell sizes, small/medium, large & extra large. Shell edge protected with tough molded metal core scuff-proof edging. Dull matte finish.

SUSPENSION: Perforated replaceable Cushion Pad sizing system allows for size adjustment and maximum air flow ventilation and increased cooling. The Cushion Pads furnished with each helmet shall be in j" & 3/8" thickness to allow for proper sizing. Easily removed for replacement, adjustment or cleaning. The FG Model incorporates large Stabilizing Pads as the sizing system.

RETENTION: Chin strap permanently riveted to the shell. 3/4" black tubular nylon webbing covered with perspiration resistant naugahyde harness. A Quick Release Buckle or Snap Fastening system allows for rapid deployment and removal of the helmet. The FG Model incorporates a rear Nape Strap for extra stability.

BREACHING AND RESCUE BLANKET

FEATURES & SPECIFICATIONS

- High cut, lightweight, non-ballistic shell features a hybrid design of unidirectional and woven composite carbon fibers.
- Designed for less extreme environments, the durable carbon construction provides protection against blunt trauma, making it ideal for rugged training, reece and water operations, and fast roping.
- Features an Ops-Core Skeleton Shroud for universal compatibility with most NVG mounts, 4-position Accessory Rail Connectors (ARCs) and external Velcro loop.
- Vent holes for increased ventilation and water drainage.
- Available with one suspension/retention option.

SKULL MOUNTING SYSTEM

FEATURES & SPECIFICATIONS

- Made of a hybrid composite of nylon and mesh fabric, the Ops-Core Skull Mounting System with Universal Front Plate is an ultra-lightweight stable platform for attaching helmet accessories in environments where ballistic and bump protection is not required.
- One size fits all; three adjustment dial knobs allow for comfort adjustments to any head size or shape.
- Features an integrated molded shroud for universal compatibility with most NVG mounts, a 4-Point Head-Loc Chinstrap and Accessory Rail Connectors (ARCs).
- Includes two pads (1/2" and 3/4" thick) for customization of fit and comfort.
- Wire and cable management system to route external wires and cables in a streamlined configuration.
- Counterweights sold separately.

BAGS & PACKS

WHILE DEPLOYED TO ANY BATTLEFIELD, I NEVER LEAVE THE COMPOUND WITHOUT MY BAGS. UTILIZED ON A DAILY BASIS, THIS BAGS ALMOST BECAME A PART OF ME PURELY FOR ITS LUXURY AND SOLIDITY,

TACTICAL BACKPACKS

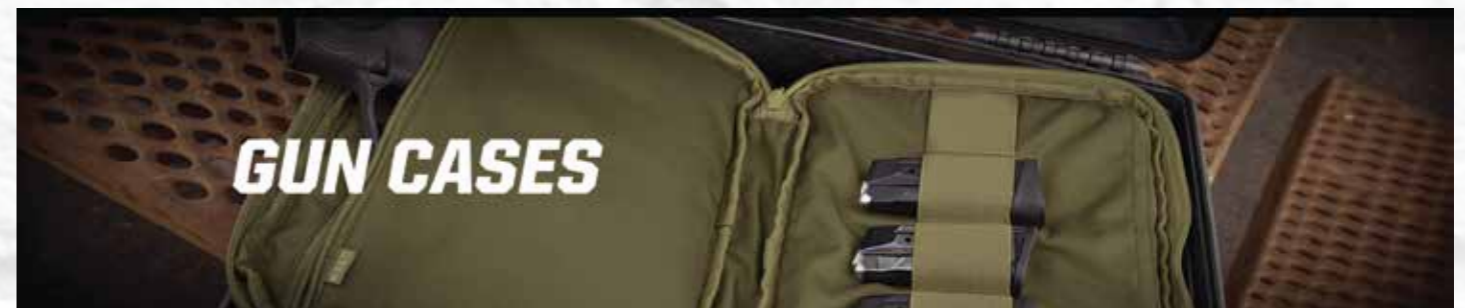

PURPOSE BUILT

The RUSH12 Backpack is a high performance multipurpose bag that fills multiple roles, from a tactical assault pack to a hunting backpack to an emergency go-bag. 16 total compartments provide a wide range of storage options, each one sized for a specific use. Additional features on the RUSH12 backpack include an internal admin panel for organizing small accessories, a 60 oz. hydration pocket that keeps you on the move, a fleece-lined sunglass pocket that protects your eyewear. An extensive wrap-around web platform is MOLLE and 5.11 SlickStick® System compatible, allowing you to customize your storage to suit your needs. The RUSH backpack offers external compression straps, adjustable shoulder straps, and a centered sternum strap to ensure stability, water resistant construction to keep your gear dry and secure in any climate.

SPECIFICATIONS:

- Water-resistant 1050D nylon
- 18" x 11" x 6.5" main compartment
- 12" x 9" x 1.75" bottom front compartment
- 17" x 11" 1.5 liter hydration pocket
- 1476 cubic inch / 24 liter total capacity
- Adjustable height sternum strap
- Two external compression straps
- Contoured yoke shoulder strap system
- Self-repairing YKK® zippers
- Glove-friendly pull tabs

PISTOL POUCH

PURPOSE BUILT

The Select Carry Pistol Pouch is the perfect concealed carry pouch for both covert ops and off duty CCW wear. Rugged, durable, and reliable, this high performance concealed carry fanny pack blends into the crowd, allowing you to stay inconspicuous. Sized for a standard size pistol, the Select Carry Pouch features our exclusive Hot-Pull™ tabs for quick and precise weapon deployment, built-in magazine slots at the front, and a fully adjustable strap with a removable pad for comfort and stability.

SPECIFICATIONS:

- Rugged 1050D nylon
- Fully adjustable strap
- Removable strap padding

PACK FOR SUBMACHINEGUN

PURPOSE BUILT

An ideal choice for covert op fire support, the Select Carry Sling Pack is built to securely and covertly store a submachinegun or similar collapsible stock short arm while remaining inconspicuous. A detachable front pouch doubles as a fanny pack, and provides enough space for a backup sidearm, knife, and additional magazines. Additional features include integrated Hot-Pull™ tabs to ensure rapid and precise weapon deployment, a rugged haul handle and breakaway strap for secure and flexible carry options, and an internal hydration bladder and water bottle pocket. The front panel and interior are MOLLE, 5.11 SlickStick®, and TacTec System™ compatible, allowing complete customization of your tactical kit.

SPECIFICATIONS:

- Rugged 1050D nylon
- 21" H x 17" L x 5" D main compartment
- 2 liter hydration pocket
- 893 cubic inch / 15 liter total capacity
- Hook and loop fastener patch panels for your ID
- Rugged haul handle
- Quick-release breakaway strap
- Padded aerospace mesh backing for comfort

HARD CASES

GUN CASES

PURPOSE BUILT

Engineered to last a lifetime in the harshest environments on earth, 5.11® Hard Cases are injection molded from lightweight, high-strength poly-propylene copolymer resins to provide completely crush-proof, dust-proof, and fully submersible water-tight load protection. Features include a temperature range of -70°F to +160°F, IP-67 rated per IEC specification 529 achieved through our unique tongue and groove system and replaceable o-ring seal, an automatic breather valve that allows pressure equalization while preventing liquid ingress to Mil-STD-648C, and resistance to UV, Solvents, Corrosion and fungus per MIL-STD-810G. 5.11 Hard Gun Cases exceed the Department of Homeland Security and Airline specifications for protective cases and are designed and manufactured in accordance with MIL-STD 810G and ATA Specification 300, Category 1. Additional features include comfortable overmolded handles at the top and side that snap down when not in use, patented trigger release latches for fast access, and a stackable design that ensures easy transport in large numbers.

SPECIFICATIONS:

- 36.5" x 14.5" x 6"
- Surpasses current applicable Mil-Standards
- Reinforced locking points
- Solid in-line skate wheels
- Stainless steel ball bearing assembly

RANGE BAGS

RANGE READY™ BAG

PURPOSE BUILT

Built with specific input from range instructors and professional shooters, the Range Ready Bag from 5.11 Tactical is engineered to be the best range bag on the market, and stores everything you need for a day at the range. Whether you're shooting alone or with a partner, this premium range bag offers more than enough space for multiple pistols and all the rounds you'll need for an afternoon. A removable ammo tote keeps you locked and loaded, a hydration pocket keeps you fresh and focused, and a removable brass tote makes clean-up a snap. A zip down front organizer stores 8 magazines, roomy side pickets offer ample space for accessories, optics, and ear protection, and padded shoulder straps allow comfortable carry. Accept no substitutes — 5.11 range bags have all the features and functionality you need to get the most out of your range time.

SPECIFICATIONS:

- Durable, all-weather 600D polyester
- Range bag measures 10" H x 21" L x 14" D
- Removable padded shoulder strap
- YKK® zipper hardware
- Hook and loop grab handle unifier

APPAREL

YOU'LL WEAR IT.

SHIRTS

PURPOSE BUILT

Engineered for superior wearability and versatility across a wide spectrum of job environments, the Long Sleeve Utility Polo provides the same crisp, clean appearance as our traditional Professional Polo, while integrated side vents provide greatly increased air flow to keep you cool and collected. Our shrink, fade, and wrinkle resistant fabrication keeps you looking your best all day long, and our traditional dual pen pockets on the left sleeve keep your writing implements within easy reach.

SPECIFICATIONS:

- 60%/40% cotton/polyester pique knit blend
- Three button placket
- 5.11® logo embroidered at left waist hem
- Strong bartacking at key stress points

PANTS

PURPOSE BUILT

5.11's® most popular pants, 5.11 Stryke™ Pants are what all other tactical pants want to be. Made from our patented two-way mechanical stretch fabric, with a fully gusseted crotch, self-adjusting tunnel waistband, and articulated knees, 5.11 Stryke Pants offer the superior range of motion necessary for active work. Built to last and blend in, these pants feature 12 smart pockets, including double-deep reinforced cargo pockets and front pockets sized for your everyday tactical carry items. On and off the job, meet your new favorite pants.

SPECIFICATIONS

- 6.76 oz. Flex-Tac® ripstop fabric
- Self-adjusting tunnel waistband
- Fully gusseted crotch
- Articulated knees (kneepad ready)
- Bartacking at major seams and stress points
- TEFLON® finish
- 12 pockets, including double-deep cargo pockets
- Rinse washed
- YKK® zippers
- Prym® snaps

BELTS

PURPOSE BUILT

A quick and convenient tactical or patrol belt that excels in a wide range of environments, our 1.75" TDU® Belt can be quickly converted into a secure tie down or secondary carry strap. Crafted from rip-resistant nylon, the 5.11® TDU belt incorporates a durable non-metallic buckle that won't set off metal detectors. Ergonomic, affordable, and highly functional, the TDU Belt is a versatile addition to your tactical or duty wardrobe.

SPECIFICATIONS:

- Durable nylon webbing
- Quadruple stitched reinforcements
- Non-metallic buckle

TDU Belt 1.75

SPECIFICATIONS:

- TPU coated B10 webbing
- 1.5" wide
- Custom cast aluminum belt buckle
- Dual retention prongs

1.5" APEX™ T-RAIL BELT

TRAVERSE® DOUBLE BUCKLE BELT

PURPOSE BUILT

A superior multi-purpose belt, the Traverse™ Double Buckle is 1.5" wide and features enhanced strength and durability in a comfortable low profile design. Ideal for both casual and duty wear, the Traverse Double Buckle Belt easily supports a holster and sidearm without rolling or deforming. Additional features include lightweight aluminum anodized buckles, ribbed weave nylon webbing, a reinforced signature 5.11® belt tip, and subtle logo touches throughout.

BOOTS

PURPOSE BUILT

Born from the need to produce the most efficient uniform boot comes the **Chase 9" Side-Zip**. Engineered and tested to perform for the elite law enforcement and military operators, this boot is fit with Original S.W.A.T.'s legendary lightweight build and performance standards, and is sure to deliver regardless of how challenging that next call is.

PURPOSE BUILT

Built to handle harsh, wet environments, **Speed 3.0 Dark Coyote Rapid Dry Boots** feature innovative rapid-dry technology. This hydrophobic micro suede absorbs less water and dries faster than traditional materials. The advanced Speed 3.0 jungle outsole delivers comfort and stability, while forefoot lugs, a fence-climbing toe, and oil- and slip-resistant multi-terrain tread provide traction and support in wet conditions. An Odor Control treatment inhibits the growth of odor-causing bacteria, and OrthoLite® insole and Strobel sock enhance comfort. The 14mm heel-to-toe drop ensures an accelerated speed. Don't let water slow you down.

Romeo

1AA Vest Light

RTUS/RBUS
Available in Sand or Black

Rotating magnetic clip attaches securely to pockets & MOLLE / OTV / MTV

- One touch push button switch has momentary signal or constant on capability
- Durable advanced polymer case
- Red, green and blue filters attach to lens and store in tail of light
- Compact and lightweight, 2 ounces with battery
- Lanyard attachment point
- Limited Lifetime warranty

Tango

1AA Helmet Light

TT5US/TB5US
Available in Sand or Black

Field programmable to select secondary color and intensity

- 5 light sources - Visible: white, red, green, blue and Night Vision: IR and IFF
- Integrated IR and IFF with lockout switch
- Rotates 360° and locks into position in 18° increments
- Mounts on either side of helmet
- Kit includes 5 mounts: helmet, cap, MOLLE, picatinny and headstrap
- Durable advanced polymer case
- Limited Lifetime warranty

LASER SIGHT

WE OWN THE NIGHT

CENTERFIRE LASERS

Control the night. CenterFire WeaponLights provide over 115 lumens of brilliant illumination, enabling the operator to positively identify a threat while keeping both hands on the firearm, where they belong. Optimized to your field of vision, the CenterFire® WeaponLight offers far greater tactical advantage than a handheld flashlight and results in faster, more accurate shots.

- Tough reinforced nylon design offers superior integration with firearm frame
- Recoil-proof LED withstands drops and repetitive fire
- 10 minute automatic time-out prevents inadvertent battery drain
- Distinct ambidextrous TAP ON/TAP OFF switch reinforces safe firearm handling
- Easily programmable for steady or disorienting strobe mode which provides a tactical edge

GUIDE ROD LASERS

Although equipping a defensive weapon with a laser sight can offer a definite tactical advantage, operator safety is of paramount importance. This is why, for over a quarter century, LaserMax has resisted the urge to adopt fads that might seem like a good idea, but potentially imperil the user in real world situations. All LaserMax sights are built with professional-grade performance and absolute operator safety in mind. Typical LaserMax performance trials include exposure to harsh conditions such as:

- intense electromagnetic fields
- extreme temperatures
- high accelerations
- deep water immersion
- salt water spray
- blowing sand
- shock and weapon recoil
- heavy impacts and drops

DIGITAL LASER RANGEFINDER

Leupolds high performance DNA (Digitally Enhanced Accuracy) engine. With readings displayed to the nearest 1/10th yard, DNAs third generation signal processing significantly increases dependability on soft, non reflective targets and provides superior ranging consistency regardless of target color. Smaller, and markedly brighter than previous range finders, the RX-1200i is less than 4 inches long and features multiple display-intensity settings.

All RX-1200i Compact rangefinders are completely weatherproof and feature multicoated optics, selectable reticles, measurements in yards or meters, and fold-down rubber eyecups to accommodate users with or without eyeglasses. Pocket-sized and packed with features, Leupolds new RX-1200i with DNA makes all other range finders dim in comparison.

A major advancement for the RX platform is the significant improvement in light transmission and resolution. Leupold developed a platform to support an Organic Light Emitting Diode (OLED) display. Instead of looking through a Liquid Crystal Display (LCD) as with traditional rangefinders, the OLED display is reflected into the light path of the RX optical system leaving a crystal clear image. When in early morning or late evening low-light conditions, the 3x greater light transmission over competitive LCD rangefinders will give you that extra advantage.

Specifications:

- Actual Magnification: 6.00 x
- Objective Clear Aperture: 22.00 mm
- Max Range (Reflective): 1215.00 yd
- Max Range (Trees): 900.00 yd
- Max Range (Deer): 800.00 yd
- Min Range: 6.00 yd
- Min Range: 6.00 m
- Linear Field of View (m/1000 m): 98.00 m
- Angular Field of View (degrees): N/A
- Weight: 221.00 g
- Length: 3.80 in
- Width: 1.40 in
- Height: 3.00 in

CoolMax Touchscreen Glove For Warm Weather

PURPOSE BUILT

- Touchscreen technology has been embedded into the materials creating a seamless design that doesn't interfere with functionality
- Combination of CoolMax performance fabric and Genuine Sheepskin leather provides both comfort and ventilation for warmer climates
- Touchscreen capability integrated into the index knuckle for those messy situations allowing user to utilize device without contaminating it if fingers are dirty

- T12-Kevlar Tactical Gove
- T41-Carbon Fiber Knuckle glove
- F03- Attacker Level 5

SPEAR GOGGLE

SPEAR GOGGLE

Includes the following:

- Matte Black Goggle Frame
- Light Rust Lens
- Smoke Grey Lens
- Clear Lens
- Protective Storage Case
- Protective Sleeve
- Anti-Fog Wipe
- Microfiber Cleaning Cloth
- Instruction Card

Product Features:

- Shatterproof Selenite™ Polycarbonate Lenses that Meet the MIL-PRF-32432(GL) Ballistic Standards, ANSI Z87.1-2010 High Velocity and Mass Impact Standards, and EN 166 B Resistance to High Speed Particles, and US Federal OSHA 1910.133(b)(1)(i) Standards
- 100 Percent UVA/UVB Protection With Distortion Free Clarity
- T-Shell™ lens coating resists scratching in extreme environments
- Foil™ Lens Coating Provides Anti-Fog Protection
- Sleek Design that is Night Vision Goggle (NVG) Compatible
- Removable Facial Cavity™ Seal
- Light Rust Lens Enhances Medium-Low Light; 53% Light Transmission
- Smoke Grey Lens Provides Max Glare Reduction with No Color Distortion: Light Transmission 15%
- Clear Lens for Night, Indoor, Overcast, and Very Low Light Conditions: Light Transmission 90%
- Rx Ready with Wiley X Spear Insert (SP29X)

VAPOR

Includes the following:

- Matte Black Frame
- Light Rust Lens
- Smoke Grey Lens
- Clear Lens
- Tactical Case with Clip
- Microfiber Cleaning Cloth
- Anti-Fog Wipe
- Rubber Tipped Leash Cord
- Instruction Card

Product Features:

- Shatterproof Selenite™ Polycarbonate Lenses that Meet the MIL-PRF-32432(GL) Ballistic Standards, ANSI Z87.1-2010 High Velocity and Mass Impact Standards, and EN-166 FT High Speed Particles at Temperature Extremes
- 100 Percent UVA/UVB Protection With Distortion Free Clarity
- T-Shell™ lens coating resists scratching in extreme environments
- Foil™ Lens Coating Provides Anti-Fog Protection
- Additional Lens Tints Sold Separately for Varying Light Conditions
- Light Rust Lens Enhances Medium-Low Light; 53% Light Transmission
- Smoke Grey Lens Provides Max Glare Reduction with No Color Distortion: Light Transmission 15%
- Clear Lens for Night, Indoor, Overcast, and Very Low Light Conditions: Light Transmission 90%
- Compatible with Wiley X's Prescription Lens Carrier (PTX), Sold Separately

HEARING PROTECTOR

The 3M™ PELTOR™ SportTac™ is an intelligent active hearing protector especially developed for hunters and shooters. The smooth adjustment of the hearing protector level dependent function gives the user particularly pleasant sound reproduction and less interference. The electronics respond at lightning speed and protect the user's hearing from loud impulse noises.

- Specially designed hearing protectors for hunters and shooters
- Smooth level dependent function, protects the user from sudden loud impulse noise.
- Interchangeable shells makes it easy to change colour
- Equipped with automatic shut-off function
- Collapsible headband for easy storage
- Audio input for external radio
- Operating time: ~ 600 hours

Specifications

- Attenuation rating (HML) H=31 M=29 L=24
- Attenuation rating (SNR) 32 Decibel
- Battery Life 1000 hours
- Colour Military Green
- Communication Type Level Dependent, External Audio Input
- Connection Type J22 Audio Input
- Features Level Dependent Function, Convertible to Built in two way communication
- Function Situational Awareness
- Hearing Protection Style Headband
- Net Weight 370 g
- Product Series Pro Tac
- Product Type Communications Headsets
- Standards/Approvals CE Approved
- User Type Military & Police, Hunting & Shooting, Industry

A sophisticated communications solution with technology and design that enhances attenuation, comfort and sound reproduction. With ProTac II you can hear your surroundings and communicate with your colleagues without taking the hearing protector off. It safeguards your ears from harmful noise, while heightening your senses and ability to react.

- Built-in level dependent function lets wearers hear ambient sound, such as conversation, machine sounds and warning signals
- Safeguards your ears from harmful noise, while heightening your senses and ability to react.
- Large space ear cushions helps prevent heat build up
- Last setting is stored when switched off
- Automatic shut-off after two hours if no function is used
- Audio input jack for external radio
- Operating time: ~ 1000 hours

EARPIECE

Our new listen only earpiece based on the popular BG-F but without a microphone or PTT switch. This is a listen only earpiece with a direct fit to the EADS Nokia THR880i. To talk to control you must use the radio's internal onboard microphone.

SPECIFICATIONS:

- Kevlar cable
- Cable length 40" / 100cm
- Cable diameter 3.6mm
- Lapel croc clip attached to transducer
- Molded Radio Plug with securing screw..
- Captive lead fixing to transducer.
- 15mm diameter transducer earpiece driver

SMART SIGHT

The Hidesight ® is an add on device for red dot, and holographic weapon sights. Hidesight enables the user to view the sight picture of the red dot sight while staying hidden behind shielding obstacles. It mounts behind the main sight, and enables the user to see through the users existing red dot, or holographic sight while staying concealed behind obstacles. Hidesight enables the user to observe or engage targets while staying protected from direct fire/ observation. Hidesight is highly useful in situations where the opposing force is significantly larger in size, carrying body armor is not an option, or when the opposing force tries to advance with help of indirect fire.

SHOOTING AROUND CORNERS

Now You can shoot from completely protected positions behind trees or around corners when it's necessary to remain unexposed to the target.

TrackingPoint brings you the first digital hunting and shooting app for Recon's smartglass technology. TrackingPoint's ShotGlass™ app on the Recon Jet™ smartglass empowers you to shoot around corners and record your hunt. These revolutionary digital shooting glasses connect wirelessly to your Tracking-Point rifle and enhance your precision-guided hunting and shooting experience using a built-in camera and high-definition video display.

GUN HOLSTERS

PURPOSE BUILT

Comfortable, contoured fit holster is positioned to where your trigger finger normally rests at "The Ready" Fully adjustable for magazine tension and cant Adjusts with simple Allen key Protective sight channel Right hand models only. Variants and newer models of the P226 may not fit.

PURPOSE BUILT

Built to be the fastest and safest Level II Holster on the market, the 5.11® Glock 19/23 ThumbDrive® Holster was field tested by Viking Tactics® and constructed in partnership with Blade-Tech®. With a unique and exclusive single-thumb retention and release system, the Glock 19/23 ThumbDrive Holster gives you a smooth, natural, and safe release, while our removable Chop-Block™ switch protector increases weapon retention capability. The ThumbDrive Holster features user-defined placement and draw angles, and optional 5.11 Drop/Offset and Thigh Rig kits (sold separately) allow a completely customized carry for maximum speed, comfort, and safety.

OVERVIEW

- Built to be the fastest and safest Level II holster on the market
- Exclusive single-thumb retention system
- Chop-Block switch protector
- Belt Paddle and Slide includes
- Will accommodate up to 2.25" belts

BATONS & HANDCUFFS

THIS DOESN'T SET THE BAR
IT BREAKS IT .

Elegantly simple... incredibly strong. Easily carried... rapidly deployed. Extended tip expansion... push button retraction. A new standard of convenience. The Talon Baton from ASP. This revolutionary new design uses two opposing discs that cam into an internal groove that is machined into each tube. Lockout is simple, stable and secure. Positive expansion complements push button retraction. The elegance of any design is measured by the quality and simplicity of its parts. In this baton you will find the premium materials, exceptional workmanship and flawless function of ASP. All combined in a push button design with minimal parts. While others are content to introduce new products, the Talon produces a new standard. This is a baton with quality, durability and performance in every detail. This is the next generation of intermediate force.

PR-24® Rigid Side-Handle Black Polycarbonate Baton

This PR-24® side-handle baton offers maximum protection. It is the most field-tested baton for blocking, controlling and striking. This fixed length rigid polycarbonate baton is designed for close-quarter confrontations and the grenade-style grip with Trumbull Stop helps keep the baton in your hand and increases baton retention and subject-control holds. Made in the USA with a limited lifetime guarantee

PLP Straight Black Polycarbonate Baton

The PLP series of lightweight rigid 1" diameter batons are easy to carry and made of durable polycarbonate that helps maintain the baton's appearance. They feature excellent impact resistance, are weather and dent resistant and won't warp, peel or splinter. Polycarbonate construction with foam grip. Lifetime repair or replacement warranty. Made in the USA.

ASP Steel Handcuffs with Tactical Security or European Pawl will provide increased control of violent subjects. Because of their conical bow geometry, the cuffs fit large subjects, yet still control small wrists. They are easily carried, rapidly applied and have a clean, smooth, finished appearance. The four point connection system allows the cuffs to fold flat and yet be worn over belts of various thicknesses. Because connecting rivets are integral with the side plate, they cannot be driven out. As with all ASP products, the design for these Hinge Handcuffs originated in the field. ASP Trainers surveyed instructors and officers throughout the world. The most desirable handcuff features were listed and categorized. The result is a handcuff unlike any other. The design introduces features, construction and materials that are innovative, real world and strong. An optimized frame design was achieved through the use of sophisticated computerized engineering programs. Strength potential was maximized through an optimal combination of materials, heat treatment, frame geometry and reinforcing ribs. The over molded stainless steel frames of ASP Hinge Handcuffs flex to the side when improperly applied to reduce injury potential from excessive lateral stress. ASP Tactical Handcuffs feature a replaceable Lock Set. The two pawl divider plate design is virtually impossible to pick.

TACTICAL ACCESS SYSTEM

HIGH PERFORMANCE
PROTECTIVE SOLUTION.

Used by many special operations and rescue teams around the world

TACTICAL ASCENDER

The T16-1 Assault Ascender

has been specially developed and approved for use by the military, the police and government agencies.

- Fully operational up to 10 meters underwater / 4 hour .
- Designed for use in industrial, urban, maritime and remote areas
- Descending Speed 0 - 145m/475ft per minute
- Range 400 m
- Net Weight: 18kg/Unit (including Battery)

Compact Launcher MK II

Compact Launchers have been specifically designed for use in the toughest maritime, remote and urban environments. We can proudly state it is trusted by many top notch units around the globe! Operations around the world have shown that the launcher is extremely effective and easy to use in difficult scenarios (diving, boat-based and land-based ops). Based on operational (end user) experience we have implemented major improvements which led to our brand new MKII model.

SIMPLE TO USE Rather than designing products that look fancy TAGS® offers products that work! After building the first prototypes we thought "how can we make this product look more cool". Soon we came to the conclusion that it would be better to keep things simple and robust. Using it in extreme cold weather conditions with inexperienced users we came to the conclusion that this was a very wise decision. The launchers are extremely easy to operate.

A compact rope container can be mounted on the left- or right side of the barrel and fits around 50m (165ft) of 9mm rope (both left- or right-handed operation possible). You can also fit both; ideal if you have to take multiple shots. The dedicated ladder canister fits a 20m/65ft FibreLight II ladder and is mounted beneath the barrel. No tools or difficult actions are needed to mount the canisters. You can easily mount them wearing thick gloves in pitch dark. Two simple rubber bands prevent the rope or ladder falling out of the canister. You can leave the bands when taking the shot.

BALLISTIC TARGETS

BUILD YOUR RANGE
LOCATE YOUR ZONE

BULLET CONTAINMENT TRAP

The bullet trap system is the safest for the trainees and provides full ballistic coverage, making it an ideal and consistent of the fire line and requires minimal maintenance, and is characterized by high quality, depending on the nature of ballistic material component of which (life span 15 years using daily shots of pistols and rifle). It is equipped with a high efficiency to collect bullets and save shooters, and all staff, and a safer environment in the entire training area. In economic terms, this system enables the provision economist by accumulating damaged bullets to put up for sale as a metal value.

How its work :

- Due to careful design, it provides full protection for new trainees and people who are observers in the vicinity of the training site.
- metal used ARMOR 500 + 550 in the whole of the basic components of the group have been installed and a stack manner as to ensure containment of the all bullets in the back inside the main trap.
- All panels are assembled with each other (no welding) also are assembled upper rows consecutive manner as to ensure the durability of the installation.

The purpose of the non-use of welding: portability group and switch its place in the future and ease of maintenance and replacement. The main structure designed from the iron which specifically designed to bear the entire weight applied and are linked to the main structure parts of the process with screws and nuts and without welding, possibility to switch place of the group in the future

- The main structure installed on a concrete base covers the entire area of the bottom of the system using screws and nuts.

- upper sheets hanging with the main structure by calibration rods.
- Installation of shade canopy over the entire device to protect it from weather.
- paint the entire collection using 2K paint (weather resistance) .
- casting a full concrete base in the bottom of the system.

STEEL TARGETS (RAMOR500)

The PT Dueling Tree is one of Action Target's most popular targets, and it's easy to see why. Spend time improving your accuracy or challenging your friend to a match. The armored steel ensures the target can withstand thousands of rounds, so you can keep shooting until you come out on top.

- 5' height
- 6" diameter reactive swinging plates
- Reactive back and forth dueling action
- Great training tool for stress induction
- Leans forward to control splatter
- No-weld target plates
- Gravity reset

Reversible plate for longer life
Adjustable knock-down sensitivity

RIMFIRE PLATE RACK

- Six 4" reactive steel plates
- Smooth cable-pull reset
- Instant visual feedback
- Angled splatter deflector plate
- No-weld target plates
- Reversible head plates

BUILT FOR THE BIG GUNS NEW Looking for a target that can handle high caliber ammo and not destroy the target in the process? Look no further. The E-50 Silhouette provides instant feedback from as close as 100 yards. The patent pending stand design ensures stability, and the easy assembly will make you want to shoot this target over and over.

- Reversible plate for longer life
- Adjustable knock-down sensitivity
